SUMMARY

Computer Science undergraduate at BRAC University (CGPA 3.47; expected Oct 2026) building production full-stack web apps, secure systems, and embedded software. Shipped live products with React, TypeScript, Next.js, Python, and PostgreSQL; experienced with cryptography, real-time control systems, and AI-assisted development workflows.

EDUCATION

BRAC University

Bachelor of Science in Computer Science | CGPA: 3.47

Dhaka, Bangladesh

Expected Oct 2026

Uttara High School and College

HSC (2021) & SSC (2019), Science | GPA: 5.00/5.00

Dhaka, Bangladesh

WORK EXPERIENCE

Founder & Sole Operator

Shoukhin Lifestyle E-Commerce — soukhin.vercel.app

Dhaka, Bangladesh

2026 – Present

- Built and deployed a full-stack production storefront solo — React/TypeScript frontend, Supabase backend, checkout, and role-based admin.
- Implemented secure bKash payment flows with server-side price validation; hardened auth using RLS, rate limiting, and secure RPCs.
- Generated 25 cold-market sales in 4 days (60% net margin); achieved 20% repeat-purchase rate within 72 hours.
- Used Claude, DeepSeek, ChatGPT, Gemini, and Perplexity to accelerate coding, localization, and technical audits.

Operations Associate

Shilar Sokher Rannaghor (E-Commerce)

Dhaka, Bangladesh

2022 – Present

- Supported order fulfillment, customer communication, and product sourcing for an online food and apparel business.

PROJECTS

Shoukhin E-Commerce Platform [LIVE]

React, TypeScript, Supabase

soukhin.vercel.app | github.com/ridhwankhan/soukhin

- Shipped a bilingual English/Bengali production storefront with checkout, role-based admin, and bKash payments for live customers.
- Deployed on Vercel with Supabase (PostgreSQL, Auth, Storage, Edge Functions), 5-tier staff access, RLS, and secure checkout RPCs.

KAIRO — Job Monitoring SaaS [LIVE]

Next.js, Supabase, Python

kairo-job.vercel.app

- Launched a live SaaS that automates career-page monitoring and job alerts; owned requirements, architecture, build, testing, and production deployment.
- Implemented admin governance for user management, account moderation, password resets, and messaging.

ZERO Trust Banking System

Django, React, Cryptography

github.com/ridhwankhan/ZERO-trust-Banking-system

- Built a secure banking prototype with role-based access control, RSA/ECC cryptography, and zero-trust design for simulated financial transactions.

Quadcopter Flight Controller (Drone)

C++, Arduino, Embedded Systems

github.com/ridhwankhan/Arduino-flight-controller

- Engineered a custom quadcopter flight controller in C++ on Arduino with MPU-6050 IMU sensing, ESC motor control, PID stabilization, and a 250Hz real-time control loop.

SKILLS

Languages: Python, C++, TypeScript, JavaScript, SQL, PHP, Bash

Frameworks: React, Next.js, Django, TensorFlow, Keras

Backend & Data: PostgreSQL, MySQL, Supabase, REST APIs, Authentication, Row-Level Security (RLS)

Systems & Tools: Git, Linux, Arduino, Embedded Systems, Vercel, Data Structures & Algorithms

Certifications: Google (Data Foundations); IBM (Machine Learning with Python — Honors; Deep Learning with Keras; Software Engineering; Linux Shell Scripting)
