SUMMARY

Motivated Computer Science graduate with a strong interest in business, operations, and management-trainee roles where clear thinking and ownership matter. Combines hands-on experience from family business support, peer study coordination, and campus club work with a solid base in data-driven decision making—including Machine Learning, predictive modeling, and real-world problem analysis. Keen to grow where accountability, teamwork, and continuous learning are valued.

EDUCATION

BRAC University

Bachelor of Science in Computer Science | CGPA: 3.47/4.00

Dhaka, Bangladesh

2022 – 2026

Thesis: Multimodal Machine Learning for Crop Decision Support in Bangladesh — defended with **98%** marks (Spring 2026).

Uttara High School and College

Dhaka, Bangladesh

SSC (2019): 5.00/5.00 | HSC (2021): 5.00/5.00 | Science

PROJECTS

Shoukhin — Lifestyle E-Commerce Brand

soukhin.vercel.app

Owner-led online store: operations, fulfillment, and customer experience

2024 – Present

- Reached a **60%** margin and **20%** repeat purchase rate shortly after launch—a clear signal of product fit and steady customer return.
- Handled orders, follow-up, and fulfillment day to day, and set up a five-role admin structure so inventory, moderation, and order work stayed organized as volume grew.
- Built and launched the bilingual storefront and admin panel (React, TypeScript, Supabase) with secure checkout for bKash and cash-on-delivery.

Fiducia Bank — Digital Banking Concept

fiducia-bank.vercel.app

Trust, roles, and transaction integrity for banking-style workflows

Course Project

- Mapped User / Admin / Authority roles so deposits, transfers, and approvals are easy for non-technical people to follow.
- Presented at the NSU Cybersecurity Inauguration; every transaction leaves an audit trail that can be checked later.
- Implemented secure access (JWT, 2FA, passkeys) and a tamper-evident transaction ledger using Django REST API and React.

KAIRO — Hiring Intelligence Tool

kairo-job.vercel.app

Helps recruiters and job seekers catch openings before they get missed

2024 – Present

- Addresses a simple hiring problem: career pages update quietly—KAIRO watches them and alerts users when something new appears.
- Added admin broadcast messaging and moderation so one person can keep many users updated without chasing everyone separately.
- Delivered the live product with Next.js, automated page monitoring (Python), and JWT-secured admin tools.

LEADERSHIP & ACTIVITIES

- Family Business Support — Shilar Sokher Rannaghor (2022 – Present):** Helps with packing, dispatch, customer updates, and vendor coordination for a family e-commerce shop; usually **20–30 orders/month** alongside university.
- Peer Group Coordinator — BRAC (2022 – Present):** Organizes study sessions, tracks deadlines, and supports classmates during project and exam periods.
- Computer Club Executive — BRAC (2022 – Present):** Helps plan workshops and club events; handles logistics and participant registration.

SKILLS

Analytics & Decision Making: Complex data handling, predictive modeling, algorithmic problem solving, real-world problem analysis, critical thinking

Modern Tech: Machine Learning, Neural Networks, Deep Learning, Natural Language Processing (NLP), TensorFlow, Keras, scikit-learn, pandas, NumPy, Python, SQL

Business Support (from live work): Order handling & fulfillment, customer follow-up, vendor coordination, peer study coordination, workshop logistics & registration, multi-role admin workflows

Tools: Microsoft Excel, dashboards, reporting, Git, GitHub, Google Workspace, VS Code | **Languages:** English (professional), Bengali (native)

CERTIFICATIONS

University of Virginia: Foundations of Business Strategy; Advanced Business Strategy

Google (Coursera): Foundations: Data, Data, Everywhere; Ask Questions to Make Data-Driven Decisions

IBM (Coursera): Machine Learning with Python (Honors); Excel Basics for Data Analysis; Data Visualization with Excel & Cognos; Introduction to Software Engineering
