

SUMMARY

Computer Science undergraduate with strong focus on **Software Engineering, Data Analytics, and Secure System Design**. Experienced in building full-stack applications, implementing machine learning models, and developing secure, scalable architectures. Demonstrates analytical thinking, leadership, and problem-solving skills suitable for both technical roles and management trainee programs.

TECHNICAL SKILLS

- **Data & Analytics:** Excel (Advanced), Pivot Tables, EDA, Dashboarding, IBM Cognos
- **Programming:** Python, SQL, C++, PHP, Dart, Bash
- **Frameworks & Tools:** Django, React, TensorFlow, Keras, Git, Linux
- **Core Areas:** Machine Learning, Backend Systems, API Development, System Design
- **Concepts:** Data Structures, Algorithms, DBMS, OOP, SDLC

TECHNICAL PROJECTS

- **ZERO Trust Banking System** Django, React, Cryptography
Project Link (GitHub)
 - Built a secure banking platform with role-based workflows and encrypted communication for financial operations.
 - Implemented RSA and ECC cryptographic modules to secure peer-to-peer transactions and sensitive data flow.
 - Applied zero-trust architecture principles to strengthen identity verification and access control.
- **Multimodal ML Framework for Agricultural Land Management** Python, Machine Learning
Thesis (Ongoing)
 - Designing a multimodal machine learning system integrating geospatial, climatic, and socio-economic datasets.
 - Preprocessing and aligning heterogeneous data sources to create structured pipelines for analysis.
 - Applying predictive models to identify land-use patterns and support data-driven agricultural decisions.
 - Handling multi-source data fusion to improve analytical consistency and model reliability.
- **Meta-Visual Deepfake Forensics** Python, Deep Learning, Computer Vision, NLP
Research Project
 - Developed a multimodal deepfake detection system combining visual features and metadata signals.
 - Leveraged computer vision and NLP techniques to improve detection accuracy on complex datasets.
 - Experimented with neural network architectures for classification and feature extraction.
 - Integrated multi-source inputs to enhance robustness against manipulated media.
- **Techie Tokor — E-Commerce Platform** PHP, MySQL
Project Link (GitHub)
 - Built a full-stack e-commerce platform supporting product search, authentication, and order workflows.
 - Designed relational database schema and optimized SQL queries for efficient data retrieval.
 - Implemented backend logic for user management, product handling, and transaction processing.
 - Ensured scalable structure for handling multiple users and dynamic content operations.
- **Server Automation & ETL Utility** Bash, Linux, Cron
Project Link (GitHub)
 - Automated routine server operations including backups using Bash scripting and scheduled cron jobs.

- Developed an ETL pipeline for data collection, transformation, and logging of external datasets.
- Reduced manual intervention by enabling scheduled and repeatable data processing workflows.

- **Quadcopter Flight Controller** C++, Arduino, Embedded Systems
[Project Link \(GitHub\)](#)
 - Engineered a quadcopter control system using embedded C++ and Arduino-based hardware.
 - Implemented PID control algorithms for real-time stabilization and flight control.
 - Integrated IMU sensors and ESC modules for precise motion and motor regulation.
 - Demonstrated real-time system control and hardware-software integration capabilities.

CERTIFICATIONS

- **Foundations: Data, Data, Everywhere** — Google
- **Excel Basics for Data Analysis** — IBM (Feb 2026)
- **Data Visualization and Dashboards with Excel and Cognos** — IBM (Feb 2026)
- **Machine Learning with Python (with Honors)** — IBM
- **Introduction to Deep Learning and Neural Networks with Keras** — IBM
- **Introduction to Software Engineering** — IBM
- **Hands-on Linux Commands and Shell Scripting** — IBM
- **Ask Questions to Make Data-Driven Decisions** — Google

LEADERSHIP & ACTIVITIES

- **Peer Group Coordinator** Independent
University Student Circle *July 2022 – Present*
 - Led a student peer group to enhance academic collaboration, knowledge sharing, and coordinated problem-solving.
 - Facilitated group sessions and activities, improving teamwork, communication, and peer engagement.
- **Executive Member** BRAC University
Computer Club *2022 – Present*
 - Supported organization of technical events and workshops.
 - Collaborated with teams to manage operations and logistics.
- **Community Member** Dhaka
Cycling Group *2022 – Present*
 - Developed teamwork, discipline, and coordination through group activities.

EDUCATION

- **BRAC University** Dhaka
BSc in Computer Science CGPA: 3.5 *2022 – 2026*
- **Uttara High School and College** Dhaka, Bangladesh
HSC (2021) & SSC (2019) — Science GPA: 5.00/5.00 in both

LANGUAGES

Bangla (Native) English (Professional)
