SUMMARY

Backend-focused engineer experienced designing APIs, auth, secure checkout RPCs, and PostgreSQL/Supabase data layers for live products. Strong emphasis on correctness, security, and reliable deployment.

SKILLS

Backend: Python, Django, REST APIs, Authentication, RLS, Secure RPCs

Data: PostgreSQL, MySQL, Supabase, SQL

Platform: Git, Linux, Vercel, Next.js integrations, Rate limiting

EXPERIENCE

Founder & Sole Operator - Shoukhin Lifestyle E-Commerce - soukhin.vercel.app

2026 - Present

- Built and deployed a production full-stack storefront (React, TypeScript, Supabase) with checkout and role-based admin.
- Implemented secure bKash payment flows with server-side price validation; hardened auth with RLS, rate limiting, and secure RPCs.
- Owned end-to-end product delivery: architecture, UI, backend, deployment on Vercel, and ongoing operations.

Operations Associate - Shilar Sokher Rannaghor (E-Commerce)

2022 - Present

- Supported order fulfillment, customer communication, and product sourcing for an online retail business.
- Built reliability habits around deadlines, stakeholder communication, and day-to-day operational ownership.

PROJECTS

Shoukhin E-Commerce Platform [LIVE]

React, TypeScript, Supabase | soukhin.vercel.app

- Shipped a bilingual English/Bengali production storefront with checkout, role-based admin, and bKash payments.
- Deployed on Vercel with Supabase (PostgreSQL, Auth, Storage, Edge Functions), multi-tier staff access, and RLS.

KAIRO - Job Monitoring SaaS [LIVE]

Next.js, Supabase, Python | kairo-job.vercel.app

- Launched a live SaaS for career-page monitoring and job alerts; owned requirements, architecture, build, and deployment.
- Implemented admin governance for user management, account moderation, password resets, and messaging.

Fiducia Bank - Zero-Trust Banking [LIVE]

Django, React, Cryptography | fiducia-bank.vercel.app

- Built a zero-trust banking platform with JWT sessions, optional 2FA, encrypted data at rest, and HMAC integrity checks.
- Added Admin/Authority workspaces for KYC and security monitoring; showcased at NSU Cybersecurity Inauguration.

EDUCATION

BRAC University - B.Sc. in Computer Science

Dhaka, Bangladesh | Expected Oct 2026 | CGPA 3.47

Relevant coursework: Data Structures & Algorithms, Databases, Software Engineering, Operating Systems, Computer Networks, Machine Learning.

Uttara High School and College - HSC (2021) & SSC (2019), Science

Dhaka, Bangladesh | GPA 5.00 / 5.00

CERTIFICATIONS

Google: Data Foundations | IBM: Machine Learning with Python; Deep Learning with Keras; Software Engineering; Linux Shell Scripting; Data Visualization; Excel for Data Analysis
