SUMMARY

Computer Science graduate (BRAC University, CGPA 3.47/4.00) with live software projects, basic Excel/SQL tracking, and part-time family-business support. Comfortable with React.js, Next.js, TypeScript, Python, Django, and PostgreSQL, plus Machine Learning, Natural Language Processing (NLP), and Neural Networks from coursework. Fluent in English and Bengali; open to software, operations, analytics, and graduate management roles.

EDUCATION

BRAC University

Bachelor of Science in Computer Science | CGPA: 3.47/4.00

Dhaka, Bangladesh

2022 – 2026

Thesis: A Multimodal Machine Learning Framework for Sustainable Crop Decision Support in Bangladesh — defended with **98%** marks (Spring 2026); fused NDVI, Sentinel-1, climate, and soil features; XGBoost yield models (Python).

Uttara High School and College

HSC (2021) and SSC (2019), Science | GPA: 5.00/5.00

Dhaka, Bangladesh

PROJECTS

Shoukhin - Full-Stack E-Commerce Platform

React, TypeScript, Supabase

soukhin.vercel.app | github.com/ridhwankhan/soukhin

- Built a production bilingual (English/Bengali) lifestyle storefront with Vite, React 18, TypeScript, and Tailwind — catalog, search/filters, wishlist, cart, checkout, order tracking, and account flows.
- Implemented Supabase PostgreSQL backend with Auth, Storage, Edge Functions, Row-Level Security, rate limiting, and a secure checkout RPC; integrated COD and bKash payments with server-side price validation.
- Designed a role-based admin dashboard (Owner, Admin, Moderator, Order Manager, Inventory Manager) with product CRUD, order workflows, low-stock alerts, staff invites, and analytics charts.
- Deployed on Vercel; closed **25 sales in 4 days** at **60%** margin with **20%** repeat purchase within 72 hours while handling sourcing and customer support.

Fiducia Bank - Zero Trust Digital Banking Platform

Django, React, Cryptography

fiducia-bank.vercel.app | [GitHub](https://github.com/ridhwankhan/fiducia-bank)

- Developed a CSE447 cryptography project with User, Admin, and Authority roles: deposits, transfers, transaction history, JWT auth, and live dashboard updates (Django API + React frontend).
- Implemented RSA-2048, ECC, and HMAC-SHA256 from scratch for profile/transaction protection and integrity checks; added TOTP 2FA, WebAuthn passkeys, trusted-device registry with revocation, and PBKDF2 password hashing.
- Built an append-only SHA-256 hash-chained ledger for tamper-evident transactions; added SQLi/XSS defenses; demonstrated at the NSU Cybersecurity Inauguration.

KAIRO - Job Monitoring SaaS

Next.js, Supabase, Python

kairo-job.vercel.app | [GitHub](https://github.com/ridhwankhan/kairo-job)

- Built a job-monitoring SaaS where users track company career pages; a Python scraper (BeautifulSoup) detects new openings and sends Telegram Bot alerts.
- Shipped a Next.js dashboard with JWT auth, Prisma + Supabase PostgreSQL, URL tracking, job listings, notification history, and preferences.
- Added admin tools for user management, content moderation, and messaging; deployed the frontend/API on Vercel.

SKILLS

Technical: React.js, Next.js, TypeScript, JavaScript, Python, Django, REST APIs, PostgreSQL, MySQL, SQL, Git, Linux, Vercel, Supabase

AI and Analytics: Machine Learning, Natural Language Processing (NLP), Neural Networks, Deep Learning, TensorFlow, Keras, Microsoft Excel, Dashboards

Soft Skills: Customer Communication, Teamwork, Adaptability, Problem Solving

Languages: English (professional), Bengali (native)

EXTRACURRICULAR ACTIVITIES

- Family Business Support — Shilar Sokher Rannaghor (2022 – Present):** Part-time help with a family e-commerce shop (food and apparel): packing, dispatch, customer updates, and vendor coordination for about **20–30 orders per month**.
- Peer Group Coordinator (2022 – Present):** Coordinate a student peer group for academic collaboration and mentoring.
- Computer Club Executive Member, BRAC University (2022 – Present):** Help organize technical workshops and event logistics.

CERTIFICATIONS

Google - Data Foundations; Data-Driven Decisions; IBM - Excel Basics; Cognos Dashboards; Machine Learning with Python (Honors); Software Engineering
